6. **Contract - Energy Procurement Advisory Services**

The District regularly reviews its electric and natural gas supply arrangements to ensure it is receiving competitive pricing and to identify opportunities for savings as existing supply contracts approach expiration. To support this ongoing due diligence, the administration recommends that the Board designate Hyperion Energy Partners LLC ("Hyperion") as the District's exclusive Broker of Record for electric and natural gas supply procurement. Hyperion provides advisory, procurement, benchmarking, and account management services to public sector clients, including New Jersey school districts and municipalities, and under this designation would monitor market conditions, benchmark the District's current rates, solicit competitive pricing from BPU-licensed suppliers, administer competitive procurement events (including electronic reverse auctions conducted in accordance with N.J.A.C. 5:34-5.6 and 5:34-5.7), review supplier contract terms for Board attorney consideration, and conduct ongoing invoice audits throughout the term of any resulting supply agreement.

This designation carries no direct cost to the District: Hyperion's compensation is paid by the winning energy supplier and built into the supply rate, and the arrangement does not obligate the District to enter into any supply agreement or accept any pricing Hyperion presents — all procurement decisions remain subject to the District's own review and applicable Board approval. The designation is limited to electric and natural gas supply only.

Recommendation: WHEREAS, the Client wishes to conduct ongoing due diligence with respect to its electric and natural gas supply arrangements and to identify opportunities for savings on future contracts; and

WHEREAS, Hyperion provides advisory, procurement, benchmarking, and ongoing account management services to public sector clients including school districts and municipalities in New Jersey; and

WHEREAS, the Client wishes to designate Hyperion as its Broker of Record for electric and natural gas supply matters, subject to the terms and conditions set forth below;

NOW, THEREFORE, in consideration of the mutual covenants set forth below, the parties agree as follows:

1. **Designation as Broker of Record.** The Client hereby designates Hyperion Energy Partners LLC as its exclusive Broker of Record for the procurement of electric supply and natural gas supply. This designation authorizes Hyperion to act on the Client's behalf with respect to supplier communications, pricing solicitations, contract negotiations, invoice review, and ongoing account management for the commodities identified above.

2. **Scope of Services.** Hyperion will provide the following services on an ongoing basis:
 - Market monitoring and periodic benchmarking of the Client's supply rates against prevailing market conditions;
 - Solicitation of indicative pricing from BPU-licensed third-party suppliers for the Client's electric and natural gas accounts;
 - Preparation of analyses comparing the Client's current spend against available third-party pricing, utility tariff rates, and aggregation options;
 - Coordination and administration of competitive procurement events, including electronic reverse auctions conducted in accordance with N.J.A.C. 5:34-5.6 and 5:34-5.7;
 - Review of supplier contracts and preparation of redline recommendations for Board attorney review;
 - Ongoing invoice audits and market updates throughout the term of any resulting supply agreement.
3. **Exclusivity.** During the term of this Contract, Hyperion shall serve as the Client's exclusive Broker of Record with respect to electric supply and natural gas supply only. The Client remains free to engage other advisors, brokers, or consultants for energy-related services outside of these two commodities, including but not limited to solar, energy efficiency projects, demand response, and capital equipment procurement.
4. **Term and Termination.** This Contract shall remain in effect on an ongoing basis until revoked in writing by either party. Either party may terminate this Contract at any time upon thirty (30) days' written notice to the other. Termination shall not affect any existing supply agreements procured under this Contract, which shall remain in force in accordance with their own terms.
5. **Compensation.** Hyperion's compensation for the services provided under this Contract shall be paid by the winning energy supplier and built into the supply rate. The Client shall have no direct financial obligation to Hyperion under this Contract.
6. **No Obligation to Transact.** This Contract does not obligate the Client to enter into any supply agreement or to accept any pricing presented by Hyperion. All final procurement decisions rest solely with the Client, subject to applicable Board approval processes.
7. **Authorization to Obtain Usage Data.** The Client authorizes Hyperion, and any electronic procurement platform designated by Hyperion (including EMEX, LLC, a division of Mantis Innovation), to obtain the Client's historical usage data, billing information, and account details from the local distribution utility and any incumbent third-party supplier for the purpose of providing the services described herein. All such information shall be treated as confidential and used solely for the purposes of this Contract.
8. **Governing Law.** This Contract shall be governed by and construed in accordance with the laws of the State of New Jersey. Any disputes arising under this Contract shall be resolved in the state courts of Middlesex County, New Jersey.
9. **Entire Agreement.** This Contract constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes any prior communications, understandings, or agreements. Any amendment or

modification must be in writing and signed by both parties.

The NJPAC Department of Professional Development will provide a three-hour workshop on November 3, 2026 for the K–12 Visual Art, Music and Theatre staff. The workshop, entitled Neurodiversity in Arts Education, will focus on strategies for engaging neurodiverse students through the arts.

The workshop description is as follows:

Our classrooms are now more diverse than ever, with students presenting a broad

range of needs and interests, and the arts are an ideal way to engage students of all abilities. In this workshop, we will explore creative methods to engage neurodiverse students through the arts, offering them organic avenues for expression that engage them physically, sensorily, and emotionally. Participants will leave with practical strategies for inclusive curriculum design to enhance student voice and choice.

This workshop is highly relevant to the work that East Brunswick Arts educators do on a daily basis as they support a wide range of learners in their classrooms. The strategies and approaches presented will provide teachers with practical tools to create more inclusive and responsive arts learning environments for all students.

The workshop will take place from 8:30 a.m. to 11:30 a.m. on November 3, 2026. The training is funded through Title II-A funds.

Recommendation: That New Jersey Performing Arts Center, Newark, NJ is approved to provide a workshop on November 3, 2026 at a cost of \$1,200.00.

Level I: Routine or Non-Specific Health Concerns

Most students will fall into this category. Students in this category have no medical diagnosis affecting their ability to function at school. There are no care plans or specialized procedures necessary. The students' physical and/ or social-emotional condition is currently uncomplicated and predictable.

Level II: Medically Complex

The student has been diagnosed with a medical condition that is well managed. The student may independently provide self-care such as blood sugar testing or self-administration of asthma medication, for example. Students with a diagnosis of autism with or without communication concern may fall into this category. Students in this category may have an Emergency Care Plan, an Individual Health Care Plan, and/ or a Classroom Management Plan.

Level III: Medically Fragile

Students with complex healthcare needs require frequent or daily attention or specialized intervention. An emergency healthcare plan and plan of nursing care developed by a registered nurse must be complete, current, and always accessible to personnel in contact with medically fragile children. Examples include students with diabetes requiring frequent testing (poorly controlled with frequent highs and lows), recurring seizures, or severe asthma requiring frequent health office visits and nursing assessment and care.

Level IV: Nursing Dependent

Nursing dependent students require 24 hours a day, one-to-one, skilled nursing care. They may be dependent on technical devices for breathing such as a respirator, and/ or require continuous nursing assessment and intervention. Without effective use of medical technology and immediate availability of nursing care, the student may experience irreversible damage or death.

II. ASSIGNMENT PLAN FOR CERTIFIED AND NON-CERTIFIED NURSES [N.J.A.C. 6A:16-2.1(b) and N.J.A.C. 6A:31-12.1(a)10]

The East Brunswick Public Schools has a Nursing Service Plan which describes school health services that are currently provided to students with medical concerns enrolled in our eleven schools. Certified school nurses provide health services and education to over 8000 students according to regulations set forth by Administrative Code 6A:16-2. The goal for school health services is to strengthen and facilitate the educational process by improving and protecting the health status of the students and staff. The district contracts with the Middlesex County Regional Educational Services to provide School Nursing Services to students enrolled in non-public schools.

Current nursing staffing levels allow health services to be delivered efficiently. There is one school nurse assigned full time to every elementary school and two nurses assigned to the upper elementary, junior high and high school. There is also a nurse's secretary assigned to the high school. Each school nurse maintains a summary of the specific medical needs of students and the nursing services required to address their needs.

The increasing population of special education and medically fragile students require ongoing assessment to ensure that all health needs (including health promotion) are met adequately. Additionally, as needed, some students have aides assigned to assist for specific medical conditions and some students have individual nurses as per their IEP's. Additional nurses (RNs) are utilized for field trips when students with medical needs leave the school building. The district has a Safety/Crisis Management Plan in place to accommodate the medical needs of students in case of emergency situations.

The certified school nurses have a crucial role in the provision of comprehensive health services. School Nurses promote health and safety, intervene with actual and potential health problems and actively collaborate with others to encourage self-management, self-advocacy, and learning.

The certified school nurses in the East Brunswick Public Schools have a multitude of roles within the scope of professional practice including assessing, planning, implementing, and evaluating the nursing care in an ongoing manner. The development of individualized health care plans, asthma action plans, and seizure action plans are carried out by the school nurses for each student with acute or chronic health concerns. The school nurses also provide health care for staff and complete necessary forms for accident reporting, workers compensation and OSHA.

The school nurses seek information regarding health histories, health practices, environmental concerns, safety issues, communicable disease patterns and current health information relevant to the practice of school nursing. Consultations with parents and guardians, pediatricians, specialists, health agencies, administrators, classroom teachers, guidance counselors, student assistance counselors, learning disability consultants, school psychologists, cafeteria staff and custodial and maintenance staff are sought in order to gather information. Students who require home instruction for medical needs are monitored by the school nurse.

School nurses serve in the role of counselor to students, parents and staff regarding health issues and personal concerns. Referrals are made to the school psychologist, student assistance specialist, school counselor and private physicians, or community health resources as needed. The school nurses play an active role in the Intervention and Referral Services Committee, 504 Committee and Child Study Team.

The role of educator is a vital role for the certified school nurses. Informal teaching takes place continuously on a one-on-one basis during the delivery of nursing care to both students and staff. Staff education on pertinent health topics such as asthma, allergies, diabetes and child abuse, etc. is provided at building meetings, faculty in-service or in small groups as appropriate. Parent education is provided through written materials, presentations, discussions and special programs. School nurses in each elementary school teach classes on drug/alcohol prevention and the family life curriculum. The school nurses work with many local groups and organizations to bring special programs into the schools.

The Assignment Plan for Certified and Noncertified Nurses was presented to the Board of Education and the public at a meeting on May 9, 2025. At this meeting, all nurses were approved for their present assignments.

III. EMERGENCY MANAGEMENT [N.J.A.C.6A:16-2.1(b)]

A. An Acute Care Management Plan:

- Emergency Management Kit (Emergency Boxes/Kit) in each nurses' office for utilization in Crisis, Emergency Evacuations
- Oxygen in each school
- Epinephrine Auto-Injector/Anaphylaxis Action Plan
- Asthma Action Plan/Diabetic Action Plan
- Seizure Action Plan

B. District Crisis Management Plan:

- East Brunswick Public Schools Safety/Crisis Management Plan

C. Community Rescue Squad and Emergency Paramedic Services:

- East Brunswick Police/Fire/Rescue Squad (911)
- Emergency Management Coordinator

IV. Nurses Services and Additional Medical Services provided to Non-Public Schools.

A. Non-Public Nursing Services (NJAC 6A 6A:16-2.3 (b) through (d)

- The Non-Public Nursing Services are provided by the Middlesex County Educational Services Commission.

On an annual basis the Non-Public School Nursing Services Report is sent to the Middlesex County Superintendents Office. This report contains individual non-public schools nursing services provided for the 2025-2026 school year, contract, copy of board meetings and statement verifying conferences was held with non-public schools.

District Recommendations

In preparing the Nursing Services Plan each year, it is critical to again review that each school continues to support the need for a full-time certified school nurse in each elementary school and two certified school nurses in each secondary school. A constantly escalating number of medically, emotionally fragile and multifaceted students, along with an ever-changing student body enrollment, lends itself to a mounting number of complex health room visits. The hiring of our own district substitute school nurses shall continue.

An emergency healthcare plan and plan of nursing care developed by a registered nurse must be complete, current, and always accessible to personnel in contact with medically fragile children. Examples include students with diabetes requiring frequent testing (poorly controlled with frequent highs and lows), recurring seizures, or severe asthma requiring frequent health office visits and nursing assessment and care.

Level 4: Nursing Dependent

Nursing dependent students require 24 hours a day, one-to-one, skilled nursing care. They may be dependent on technological devices for breathing such as a respirator, and/or require continuous nursing assessment and intervention. Without effective use of medical technology and immediate availability of nursing care, the student may experience irreversible damage or death.

Level 1: Routine or Non- Specific Health Concerns

Most students will fall into this category. Students in this category have no medical diagnosis affecting their ability to function at school. There are no care plans or specialized procedures necessary. The students' physical and/or social-emotional condition is currently uncomplicated and predictable.

Level 2: Medically Complex

The student has been diagnosed with a medical condition that is well managed. The student may independently provide self-care such as blood sugar testing or self-administration of asthma medication, for example. Students with a diagnosis of autism with or without communication concerns may fall into this category. Students in this category may have an Emergency Care Plan, an Individualized Health Care Plan (IHCP), and/or a Classroom Management Plan.

Level 3: Medically Fragile

Students with complex healthcare needs require frequent or daily attention or specialized intervention. An emergency healthcare plan and plan of nursing care developed by a registered nurse must be complete, current, and always accessible to personnel in contact with medically fragile children. Examples include students with diabetes requiring frequent testing (poorly controlled with frequent highs and lows), recurring seizures, or severe asthma requiring frequent health office visits and nursing assessment and care.

Level 4: Nursing Dependent

Nursing dependent students require 24 hours a day, one-to-one, skilled nursing care. They may be dependent on technological devices for breathing such as a respirator, and/or require continuous nursing assessment and intervention. Without effective use of medical technology and immediate availability of nursing care, the student may experience irreversible damage or death.
